

MILLIKEN VALVE COMPANY

ECCENTRIC PLUG VALVE

THE DESIGN

The Milliken eccentric from 1/2"-72" pipe size, was designed with high flow capacity as one of the overriding priorities. To ensure a large unobstructed flow area, a high strength ductile iron plug is used - instead of the standard cast iron. By using ductile iron, a thinner - but stronger- cross sectional plug provides for an unobstructed flow area substantially greater than other manufacturer's flow area.

THE RESULT

The Millcentric by Milliken is not only fully piggable - but it provides some of the highest flow coefficients and solids passage measurements available - ultimately providing a more reliable, efficient, and less costly system to the owner.

ADDITIONAL MILLIKEN MUNICIPAL VALVE PRODUCTS

- MULTIPORT ECCENTRICS • AWWA BUTTERFLY VALVES •
- AWWA CHECK VALVES • RUBBER FLAPPER CHECKS
- LUBRICATED PLUG VALVES •
