

Milliken Valve, LLC. Is Awarded OSHA's Star Designation

Bethlehem Township, PA, (March 11, 2011). — The U.S. Department of Labor's Occupational Safety and Health Administration (OSHA) has recognized Milliken Valve, LLC., with its "Star" worksite designation, the highest honor in OSHA's Voluntary Protection Programs (VPP).

Located in the Lehigh Valley Industrial Park, Milliken Valve is a subsidiary of Mueller Water Products, Inc. (NYSE: MWA), a leading North American provider of water infrastructure products and services.

OSHA's "Star" designation recognizes employers and employees in private industry and federal agencies that have implemented effective safety and health management systems and maintain injury and illness rates below National Bureau of Labor Statistics averages for their respective industries. Through the VPP, Milliken Valve and OSHA work cooperatively and proactively to prevent injuries, illnesses and fatalities through hazard prevention and control, worksite analysis, training, management and worker involvement.

"We are honored to receive OSHA's Star certification," said Bob Jackson, president of Milliken Valve. "Focusing on creating and maintaining a safe environment is a priority. Our employees have embraced the program and collectively we have designed and implemented a safety program that has made Milliken a safer and better place to work."

The company plans to hold a VPP ceremony on April 6, 2011 during which OSHA will present the "Star" award and flag to Milliken Valve.

Safe Harbor Statement

This press release contains certain statements that may be deemed "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. All statements that address activities, events or developments that we intend, expect, plan, project, believe or anticipate will or may occur in the future are forward-looking statements. Forward-looking statements are based on certain assumptions and assessments made by us in light of our experience and perception of historical trends, current conditions and expected future developments. Actual results and the timing of events may differ materially from those contemplated by the forward-looking statements due to a number of factors, including regional, national or global political, economic, business, competitive, market and regulatory conditions and the following:

- the level of spending on water and wastewater infrastructure;
- the demand level of manufacturing and construction activity;
- our ability to service our debt obligations; and

- the other factors that are described in the section entitled "RISK FACTORS" in Item 1A of our most recently filed Annual Report on Form 10-K.

Undue reliance should not be placed on any forward-looking statements. We do not have any intention or obligation to update forward-looking statements, except as required by law.
