

Milliken Valve Company Attains ISO 9001:2000 Certification for Quality Management Systems

Adherence to Internationally Recognized ISO Standards Verifies Milliken's Commitment to Quality and Customer Satisfaction

BETHLEHEM, Pennsylvania – (April 1, 2009) – Milliken Valve company, a market leader in the water/wastewater valve industry, today announced that HSB Registration Services, an official accreditation body for ISO 9001 standards, granted Milliken ISO 9001:2000 certification for quality management systems (QMS). Globally recognized and respected, ISO 9001:2000 standards are set by the International Organization for Standardization (ISO), a Geneva-based worldwide federation of national standard bodies. This certification demonstrates Milliken's dedication to and implementation of a dedicated, systematic and quantifiable approach to quality-of-service standards through a rigorous auditing process.

"ISO 9001:2000 certification is an important milestone for Milliken and demonstrates our commitment to delivering the world class quality service and satisfaction that our customers have come to expect," said Robert Jackson, President of Milliken Valve Company. "The quality management system we have implemented provides assurances to our customers that we will continue our tradition of developing and providing products, services and support of the highest level."

ISO 9001:2000 standards specify organizational requirements in documentation, procedures and operations for a quality management system and are important for a business focused on demonstrating its ability to consistently provide products or services that meet customer satisfaction and applicable regulatory requirements. In achieving ISO certification, Milliken has demonstrated solid standards and baselines in order to meet and exceed benchmarks going forward for quality customer service and support in the design, development, support and manufacturing operations of valves for the water and wastewater markets.
